

BASIC PR AIR PURIFIER

The PR series is a family of portable air and surface cleaning systems.

BioZone Basic PR air purifier utilizes purification technology with UVC light, photoplasma and ionization. Effective for reducing volatile organic compounds (VOCs), dust/particles, viruses, bacteria, mold spores and odors. The units are stylish and quiet. Mounted high up on the wall (approx. 2 meters) away from negative pressure. Is quiet and can be set to "night mode".

BioZone Basic PR can be mounted in meeting rooms, canteens, shops, offices, reception, and more.

The PR units are manufactured by BioZone Scientific International, an award winning and leading company in UVC purification technology.
