

M25

Removable air cleaner for large areas.

The M25 is a smart and efficient air purifier for large areas such as conference rooms, hotels and other large indoor areas. The air cleaner has an efficient room size of 100 m² and cleans 720 m³ of air per hour. The M25 removes 99.9% harmful particles from the air, ensuring a healthy indoor climate and an efficient working environment.

The M25 is controlled remotely or via the touch panel located at the front of the air cleaner. The air cleaner is also equipped with wheels that make it easy to move around. With the LED indicator on the front of the air cleaner, you can keep an eye on the air quality, which is indicated by a colour and shows four levels from very good to very bad.

- Used for large indoor environments
- Movable with wheels
- LED indicator shows the air quality
- Uses a pre-filter, a HEPA-filter and activated
- Effectively removes 99.9% harmful particles from the air
- Controlled with remote control and via touch panel
- Power Consumption: 220-240 V~50 Hz/60 Hz(115 W)
- Air flow: 720 m³/h
- Dimensions (WxHxL in mm): 490x725x245
- Weight: 16 kg
- Effective room size: 100 m²

SPECIFICATIONS

The M25 is a smart and efficient air cleaner for large indoor environments. The M25 uses a 6-layer filtration system with HEPA-filter and activated carbon filter that effectively removes harmful particles, bacteria and bad odours from the air, thereby creating a healthy indoor climate.

- Effectively removes harmful particles
- Room size 100 m²
- Remote control and touch panel

Filtering the air ensures a healthy indoor climate.

Measure air quality in real time

The Air Image sensor can be connected with your air cleaner and gives you a real-time reporting of the indoor air quality. With Air Image you can control the air flow and thus optimize the energy consumption and achieve optimum air quality.
